# The competitive Pokémon TCG app.

## Track. Learn. Win.

DeckSequence is a match tracker for competitive players. Log every match you play, on the PTCG Live ladder, at locals or at a Regional, and see which deck, and which version of your list, actually wins, and against what.

Web · iOS · Android · Free to log, forever · 30 days of Pro at signup, no card

Screens show sample data

AT A GLANCE

# One record of every match you play, so you know what wins.

Built for the player who already plays a lot and wants to play better: ladder grinders, league regulars, and Cup and Regional attendees.

THE PROBLEM

### The record dies with the list change

Cut a card, keep playing, and the old version's results blur into the new one's.

THE PROBLEM

### Online and paper never meet

Ladder matches leave a battle log. Paper matches leave nothing. No single view covers both.

THE PROBLEM

### Review stays vague

"You misplayed somewhere in the mid-game" is the best a friend can do after the fact.

THE ANSWER

### Versioned decks

Change a list and the old version keeps its own matches. **v1.3 beat Charizard 54%, v1.2 went 48%.**

THE ANSWER

### Ladder, Locals, Regionals

Paste a PTCG Live battle log for a full replay, or log a paper match in well under a minute. Same record, same stats.

THE ANSWER

### Turn-pinned review

Share a replay and your testing partner comments on turn 4, not "somewhere".

FREE VS PRO

| | |
|---|---|
| **Free, forever** | Unlimited match logging, battle-log replays, deck versions, tournaments, sharing, overall and per-deck record. |
| **Pro** | Win rate and W–L–T record per matchup and per deck version, head-to-head version comparison, and how often each card is seen and played. |
| **Price** | $6.99/month or $59.99/year (USD). Cancel any time. |
| **Trial** | Every new account gets full Pro for 30 days. No card required. |

HOW IT READS

**58%** win rate · 103 matches

W 60 L 42 T 1

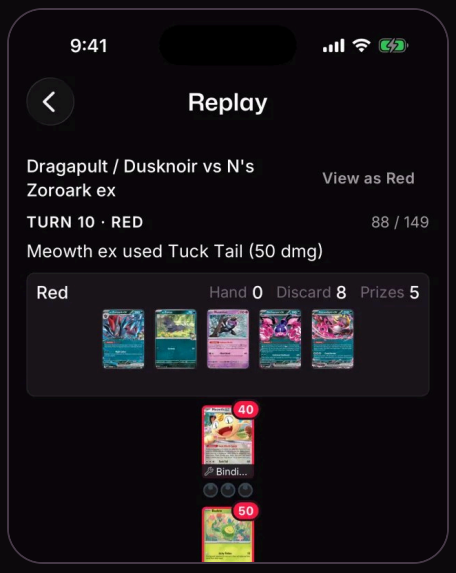

| | |
|---|---|
| **vs N's Zoroark ex** | 14–13 · 52% |
| **vs Alakazam** | 14–8 · 64% |
| **vs Dragapult ex** | 7–1 · 88% · small sample |

Results always pair a W/L/T glyph with color. Thin records are labelled, not inflated.

WHAT TO SHOW ON CAMERA

# Six screens worth a close-up.

All of these ship on web, iOS and Android on the same account. Sample screens below; your own data will look better on stream.

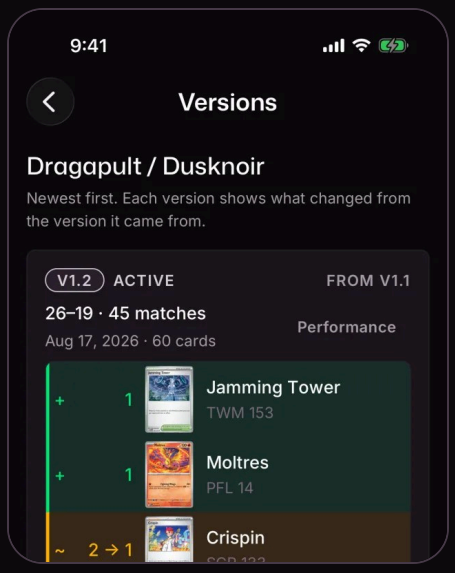

## Replay FREE

Paste a PTCG Live battle log and scrub the match turn by turn, both boards and your hand.

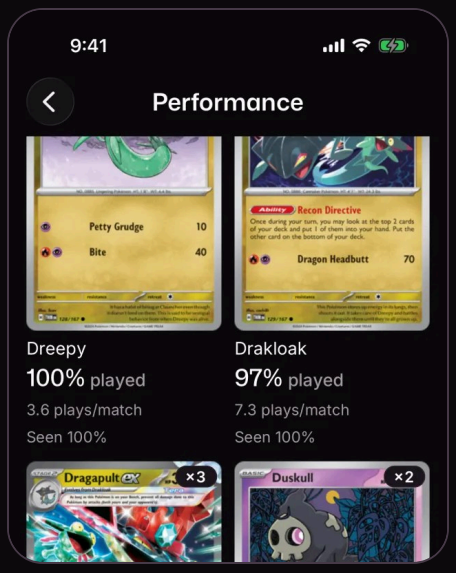

## Matchup Spread PRO

Your record against every opponent deck, filterable by Ladder, Locals and Regionals.

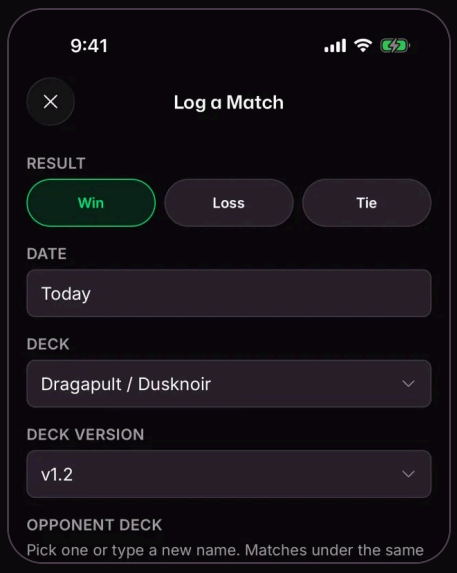

## Deck versions PRO

Every list change becomes a version, +2 Super Rod / −2 Iono, with its own win rate.

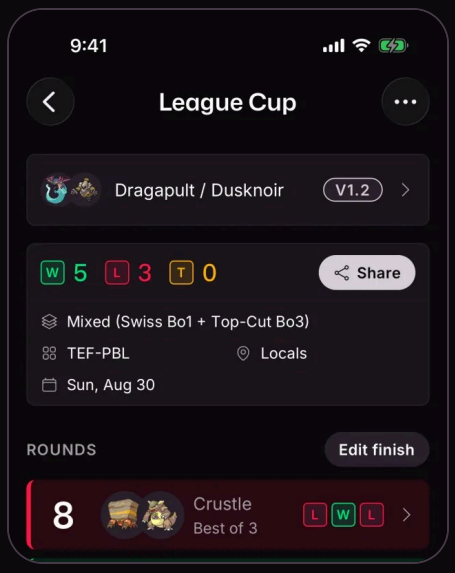

## Card usage PRO

How often each card was played, and how often you drew it and never played it. Nobody else has this.

## Log a match FREE

The paper path. Deck, version, opponent, result, turn order. Done between rounds.

## Tournaments FREE

Log a Cup or Regional round by round while it's still running, and keep the recap.

CONTENT IDEAS

# Formats that suit the product.

Starting points, not a script. Your voice and your format come first; the facts on the right are the only part that has to be exact.

**1** **A week on ladder, by the numbers**
Paste every battle log for a week, then walk the Matchup Spread. Which matchups are real, and which are a small sample.

**2** **v1.2 vs v1.3**
Change two cards, play the same field, and settle it with the version comparison instead of a feeling.

**3** **Turn 4 review**
Share a replay with a testing partner or your chat and let them comment on the exact turn where it went wrong.

**4** **Regional, round by round**
Log each round on your phone at the venue, then open the tournament recap for the vlog outro.

**5** **Dead cards**
Card usage shows the cards you drew and never played. A natural lead-in to a list-cutting segment.

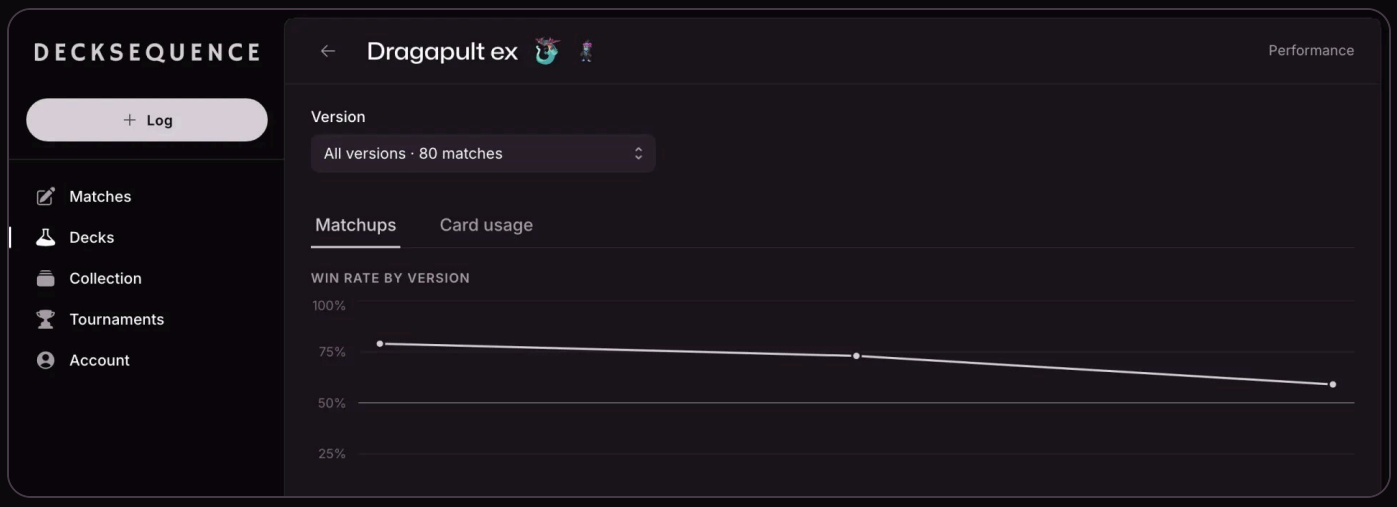

**6** **Copy a winning list**
Open a competitive decklist on decksequence.com/decks, copy it into your Deck Lab in one tap, and check the draw odds.

GET THESE RIGHT

- ✓ Spelled **DeckSequence**, one word, capital D and S.
- ✓ Replays are **free**. Pro is the win rates and records behind matchups and versions, plus card usage.
- ✓ 30 days of full Pro at signup, no card. Free logging never stops.
- ✓ Web, iOS and Android, one account.
- ✗ Not AI coaching, and no automatic opponent or archetype detection. You type the opponent's deck.
- ✗ No user counts or growth claims. Sample data on screen isn't a usage figure.
- ✗ Not official, and not a competitive edge inside sanctioned play beyond your own record.

**Please include in the description:** DeckSequence is an unofficial, fan-made companion tool, not affiliated with, endorsed, sponsored, or approved by Nintendo, Creatures Inc., GAME FREAK inc., or The Pokémon Company.
